Subject: Bopp 2005 data

Hi Alice,

Attached is a file containing the analytical data EPA obtained from chemical analysis of the 2005 Bopp cores from Dundee Lake. I don't believe the data were independently validated by an EPA validator. There are lab qualifiers contained in the file. The samples themselves were analyzed by EPA in 2007. The radionuclide results were obtained by Bopp in 2005. We have charts and tables from Richard but no formal transmittal of the radionuclide data. We are requesting that from Richard now. We did not need the raw data tables for our analysis since he had analyzed the Cs-137 profiles himself.

The data represent two Bopp cores, "Pass8B" and "Pass 8BP", by his naming scheme. They were both collected on June 9, 2005.
